

Stock Market Investment Returns Investment Returns Investment Returns

written by Chandradip News24 | January 6, 2025

Investment returns are the gains or losses on an investment. They are calculated as a percentage of the initial investment. Investment returns can be positive or negative, depending on the performance of the investment. Investment returns are an important factor in determining the overall return on an investment.

Investment returns are calculated as a percentage of the initial investment. They are calculated as the difference between the final value of the investment and the initial value, divided by the initial value. Investment returns can be calculated for a single period or over a longer period. Investment returns are an important factor in determining the overall return on an investment.
