

# Oil prices surge 10% in 2024

written by Chandradip News24 | November 20, 2024

The price of oil has risen significantly in 2024, reaching a 10% increase by the end of the year. This surge is primarily due to global supply chain disruptions and increased demand. Major oil-producing countries have seen a decline in output, leading to a shortage of oil on the international market. Additionally, the global economy's recovery has led to a surge in demand for oil, particularly in the transportation and industrial sectors.

Oil prices (per barrel) have risen from approximately \$70 in early 2024 to over \$80 by the end of the year. This increase is a result of several factors, including geopolitical tensions in the Middle East, which have led to a reduction in oil supply. Furthermore, the global economy's recovery has led to a surge in demand for oil, particularly in the transportation and industrial sectors. The price of oil is expected to continue to rise in the coming months, as supply chain disruptions and increased demand persist.

Oil prices, which have risen significantly in 2024, are expected to continue to rise in the coming months. This is due to a combination of factors, including global supply chain disruptions and increased demand. The price of oil is expected to reach a new peak in the next few months, as supply chain disruptions and increased demand persist.
