

# SpaceX Crew-9 Mission Update: Astronauts Report 'Unusual' Sensations

written by Chandradip News24 | October 27, 2024

SpaceX Crew-9 Mission Update: Astronauts Report 'Unusual' Sensations. The mission is currently on track, but the crew has reported some minor anomalies. The spacecraft is maintaining a stable orbit, and the crew is performing routine maintenance tasks. The mission is expected to last for approximately 28 days. The crew will be returning to Earth on October 30, 2024. The mission is being monitored by SpaceX and NASA. The crew is currently in good health and is performing well. The mission is a success so far.
